

ATTENTION AIRPORT USERS

The Aviation Program will have a pavement maintenance project ongoing at the Middlebury State Airport during the summer of 2016. The project will consist of crack sealing areas on the taxiways and fuel apron. We will soon have a schedule for when the work will be done at each airport and will post that on the Vermont Aviation Website. We expect the overall work to begin during the week of August 22, 2016 and end around early October. The project schedule is subject to change due to weather conditions so closure times for each airport may vary. This pavement maintenance work will be occurring at other Vermont State Airports.

Please contact Jason Owen at 802-595-1215 for updated information regarding closure times.
