

Quechee Gorge Bridge Project Fall 2022 Update

The Hartford Quechee Gorge Bridge project, NH 020-2(45) was advertised for construction bids on August 10, 2022. Although several construction companies had attended the mandatory pre-bid meeting, only one submitted a bid by the September 23, 2022 due date. The Vermont Agency of Transportation determined that the bid was not feasible and was thus rejected.

The Agency is currently re-evaluating the project requirements included in the contract to determine what can be modified, while maintaining the project intent, to generate more interest amongst the contracting community. The Agency expects to re-advertise the project in Spring 2023.

An updated project schedule will be posted at a later date.
