

State Airport System Plan Update

Public Meeting

Wednesday, October 10th, 2018

Stowe Town Office

Introductions – Dan Delabruere, Michele Boomhower (economic development) - VTrans

Power Point Presentation – Costa Pappis (VTrans)

- Does the State know where planes are coming from and going to which are using State airports? Costa explained that we know what airports aircraft are taking-off and landing from, but not where their coming from or heading for general aviation operations. For commercial service airports, we do know the origin and destination of passengers.
- Will the Categorization of the Morrisville-Stowe Airport be in the next Category up under this new plan? Cost explained that the analysis conducted by consultant McFarland Johnson classifies the Morrisville-Stowe State Airport as Category 3 – regional gateway.
- Do we know the costs to maintain each airport?
