

VERMONT AGENCY OF TRANSPORTATION

COMPLETE STREETS PROJECTS LIST

CONSTRUCTION YEAR 2019

During the 2011 legislative session, the Complete Streets Bill (Act 34) was passed to "ensure that the needs of all users of Vermont's transportation system - including motorists, bicyclists, public transportation users, and pedestrians of all ages and abilities - are considered in all state and municipally managed transportation projects and project phases." The language in the bill excludes unpaved highways.

The bill requires the Agency to make available to the public a list of all state and municipal projects that incorporated complete streets principles, including a project description and its location.

The bill also requires the Agency to make available to the public a list of all state and municipal projects that did not incorporate complete streets principles with an identification of which exemption was applied. Exemptions are allowed where use of the transportation facility by pedestrians, bicyclists or other users is prohibited by law; where the cost of incorporating complete streets principles is disproportionate to the need or probable use; and/or incorporating complete streets principles is outside the scope of a project by its very nature.

The attached list summarizes which Vermont Agency of Transportation projects advertised in 2019 incorporated complete streets principles or were exempt. The Agency has requested project information from Vermont municipalities via the Regional Planning Commissions, and some municipal project information has been received to date. The bill does not empower the Agency to compel municipalities to provide the information, so the Agency will continue to educate and assist municipalities and partners with meeting the requirements of the Complete Streets bill.

TOTAL NUMBER OF 2019 PROJECTS: 106

TOTAL NUMBER OF 2019 COMPLIANT PROJECTS: 68

TOTAL NUMBER OF 2019 EXEMPT PROJECTS: 38

Exemption Types - Limited Access - 12, Outside Scope - 26, Cost - 0
