

## **Construction Update Middlebury Bridge & Rail Project – Week of Dec 10-14**

The contractor for the Middlebury Bridge & Rail Project will concentrate on off-roadway work. Work will include completing installation of the stormwater drainage system. Excavation through 422 feet of bedrock, soil, rock and clay (a three-month task) wrapped up a few weeks ago. To finish the drainage system, the contractor needs to install pipes within the steel casing of the tunnels and construct a headwall adjacent to the Middlebury waterfalls and Otter Creek on the lower level of Marble Works Green.

Travelers may experience minor, intermittent delays as construction vehicles enter and exit the work zone at the Marble Works area and at Main Street (Route 30) and Merchant Row.

For information on the project view the project website,
