**Construction Update**  
**Middlebury Bridge & Rail Project**

---

*Crews install a fiberglass liner in one of Triangle Park's new storm pipes.*

**DATE:** September 17, 2021

**TRAFFIC IMPACT**

Motorists are advised to use caution when entering and exiting the Marble Works on Middle Seymour Street due to continued construction on the Amtrak rail platform.

**CONSTRUCTION ACTIVITIES**

As mentioned in previous weeks, the Middlebury Bridge & Rail Project has reached a substantial completion milestone. This means that all contract work except for minor "punch list" items is complete.

With construction shifting to minor repairs, our weekly updates will be winding down. Starting this week, construction updates will only be sent as needed.

In construction news, Printer's Alley reopened to traffic entering the Marble Works from Main Street. Sidewalks in Triangle Park will be pressure-washed and grass will be restored next week. At the Amtrak rail platform, crews continue to install the metal roof and an ADA lift.

**LOCATION:** Triangle Park, Printer's Alley, and Lazarus Park

**PROJECTED COMPLETION:** September 2021
