
Construction Update
Middlebury Bridge & Rail Project

This aerial photograph by Middlebury photographer Caleb Kenna shows construction nearly completed in downtown Middlebury.

DATE: November 19, 2021

The Middlebury Bridge & Rail Project Team wants to thank the nearly 200 people who completed the 15-question survey to document the community's opinions of the downtown construction project. The feedback received in this survey documents the public's perspective on the project and will help inform future Vermont Agency of Transportation (VTrans) projects.

Some of the community comments that were submitted in response to the survey include:

- "The town of Middlebury has been forever changed for the better."
- "The tone of the communication was accurate, empathetic, and created a sense of unity in the community that really helped us get through this incredibly complex and lengthy project."
- "I felt connected to this project in a way that I would not have otherwise."

To view the results of the survey, please click [here](#) or on the button below.

The Middlebury Bridge & Rail Project Team wishes everyone a Happy Thanksgiving!
