

Construction Update Middlebury Bridge & Rail Project – Week of Dec 17-21

The contractor for the Middlebury Bridge & Rail Project will concentrate on off-roadway work. Work will include completing installation of the stormwater drainage system. Excavation through 422 feet of bedrock, soil, rock and clay (a three-month task) wrapped up a few weeks ago. Next week, the contractor will continue setting manhole structures in the launch and receiving pits, connecting the three carrier pipes to those structures and then filling the bottom of the pits with flowable fill.

Travelers may experience minor, intermittent delays as construction vehicles enter and exit the work zone at the Marble Works area and at Main Street (Route 30) and Merchant Row.

For information on the project view the project website,
