Contractor Work

The contractor has been given the notice to proceed, and work is expected to begin this month. After August 28th, the paint contractor is expected to begin installing the scaffolding under the bridge. Lane closures, using flaggers during the core hours (8 AM - 5 PM) of the workday, will begin within the upcoming weeks.

Members of the public are encouraged to visit the project [web page](#) for more information. All updates to construction activity will be posted to the website regularly.

Public Meeting

The Vermont Agency of Transportation (VTrans) hosted a public meeting on Thursday, July 27th to discuss information on the short- and long-term construction schedule and general traffic impacts. Thanks to all those that joined us in-person and online!

The project team posted the public meeting materials to the [Document Library](#) page. You can find the meeting presentation, video, and meeting summary on this page.

If you have questions or comments, please reach out to the community engagement consultant, Marcy Miller.
