

Quechee Gorge Bridge Construction Project Update

Construction Update

In April 2024, the contractor resumed work on the Quechee Gorge Bridge. Several features were implemented, including the eastbound lane closure and alternating travel over the bridge, controlled by a traffic signal. This closure and one-way alternating traffic will continue until spring 2025.

Motorists should expect some additional delays over the next week as workers adjust lane widths to prepare for winter travel. Flaggers will direct traffic during this effort. The safety of the traveling public is the greatest priority.

Hiking Near the Bridge

For those traveling by foot, the trail is closed at the bridge underpass through the fall of 2025. The adjacent trail is open via a signed detour through the visitor center. Like last year, the contractor is using the southwest parking area as a staging site.

For More Information

Members of the public are encouraged to visit the [project web page](#) for more information. All updates to construction activity will be posted to the website regularly. If you have questions or comments, please reach out to the Public

Information Consultant, Marcy Miller.
