

### Quechee Gorge Bridge Construction Project Update

---

#### **Overview**

In April 2024, the contractor resumed work on the Quechee Gorge Bridge. Several features were implemented, including the eastbound lane closure and alternating travel over the bridge, controlled by a traffic signal. This closure and one-way alternating traffic will continue until spring 2025.

#### **Construction Update**

Workers have been preparing to shut down construction for the winter season. The travel lane is now 15-feet wide to allow for snow plows to fit within it. The pedestrian fence that separates the northern sidewalk from the travel lane has been removed to make space for winter maintenance. The fence will be re-erected in spring 2025.

#### **Hiking Near the Bridge**

For those traveling by foot, the trail is closed at the bridge underpass through the fall of 2025. The adjacent trail is open via a signed detour through the visitor center. Like last year, the contractor is using the southwest parking area as a staging site.

#### **For More Information**

Members of the public are encouraged to visit the [project web page](#) for more information. All updates to construction activity will be posted to the website regularly. If you have questions or comments, please reach out to the Public Information Consultant, Marcy Miller.

**Date: November 21, 2024**
