

Quechee Gorge Bridge Project Continues on Adjusted Timeline

Quechee Gorge Bridge Stakeholder,

Thank you for your patience as the status of the Quechee Gorge Bridge Project has been placed on hold due to changing funding scenarios.

Good News!

The Vermont Agency of Transportation (AOT) will advance the Quechee Gorge Bridge Project on an adjusted timeline as construction funding for this project becomes available.

AOT addressed immediate concerns with the Quechee Gorge Bridge by installing the temporary safety fence in 2018. This bridge still requires a major rehabilitation to address the structural and function concerns to ensure long term performance. The project as currently designed will do that.

Our team will host a public meeting once the project is bid and a contractor is selected.

If you have questions or comments, please reach out to Public Information Consultant Shawna Kitzman at the contact below.

Kindly,
The Quechee Gorge Bridge Project Team
