

Grantee Name	Project Titles	Total award	Project Description
Advance Transit	Eliminating Information Barriers and Building Incentive for Transit Usage	\$44,608.75	Develop educational videos and resources that encourage the use of public transit and make the experience more approachable by providing answers to common questions from new riders and highlighting the benefits and impact of public transportation.
Lamoille Community House	Lamoille Community House E-Bikes	\$10,882.50	Establishing an e-bike reservation and/or check-out system, so that residents can travel to downtown Morrisville during the non-winter months when they need access to services and destinations including work, pharmacy and grocery shopping; job interviews; hospital visits; doctor's appointments, and just general outings.
CarShare VT	Expanding CarShare Vermont to Winooski	\$160,900.00	Expand carsharing to Winooski, where the need for mobility services is great, yet the limited availability of public transit and other factors necessitate a greater degree of subsidy to sustain a carsharing service there.
NetZero Vermont	Expanding Montpelier E-Bike Lending Library	\$13,750.00	Expand reach into satellite communities and form new partnerships, working with the City's Senior Activity Center and the Department of Recreation, Parks and Trees to make two more e-bikes available.
	Walk to Shop	\$65,855.00	Advance a multi-layered outreach and engagement campaign including facilitating multi-organizational collaboration to advance mobility independence, as it facilitates the universal task of walking and carrying groceries and other essentials home safely and with ease.
Bugbee Senior Center	Life After Driving: Freedom and Mobility while Aging in Place	\$15,778.75	Pilot a new, multi-day workshop connecting seniors with alternative transportation modes, teaching the basics of transportation advocacy, and would result in a toolkit to help other regions build similar programs for the senior community.
VEEP	Transportation Initiatives in Education 2022	\$62,500.00	Continuation of Vermont Energy Education Program (VEEP)'s current Kindergarten through 12th grade (K-12) transportation programming in schools and will allow VEEP to design, pilot and expand a travel training curriculum for regular and micro-transit service for K-12 students and their families
Vital Communities	Upper Valley TDM Programming	\$188,387.50	Supports regional TDM programming for towns and workplaces, informs municipal and regional planning, and connects members to broader TDM networks.
Town of Williston	Microtransit Feasibility Study	\$32,860.00	Conduct a microtransit feasibility study. The feasibility study will engage consultant services to 1) conduct outreach to local residents and businesses to better understand the current transportation needs, 2) develop options to meet the needs, 3) compare possible alternatives and choose a preferred alternative, 4) evaluate the cost and feasibility of the preferred alternative, and 5) present next steps to pursue implementation, if appropriate.
RCT	Microtransit Operations	\$23,794.00	Support Microtransit operations in Morrisville.
GMCN	Microtransit Operations	\$42,000.00	Support Microtransit operations in Manchester.
SEVT	Microtransit Operations	\$30,000.00	Support Microtransit operations in Windsor.
GMT Montpelier	Microtransit Operations	\$216,121.00	Support Microtransit operations in Montpelier.
GMT Barre	Microtransit Operations	\$77,325.00	Support Microtransit operations in Barre.
